

Trade Show Backdrop, up in minutes

Tension fabric backdrop display package. No tools required, one person, a few minutes.

Set it up

- 1 Lay the aluminum frame poles out and connect them by number until the frame is a full rectangle.
- 2 Stand the frame upright and lock the cross braces so it holds its shape.
- 3 Slide the fabric graphic over the top of the frame like a pillowcase.
- 4 Pull it down evenly on all sides so the print sits flat and centered.
- 5 Zip the bottom closed, then smooth any wrinkles by hand. They relax within an hour.

CARE & STORAGE

Spot clean with mild soap and water, then air dry. Never machine wash or iron directly on the print. Fold the fabric loosely and keep it in the carry bag with the frame between events.
